

"Declaration of Unobjectability

A general ban on the marketing of all toys and child care articles containing the softeners DEHP, DBP and BBP and for all toys and childcare articles containing the softeners DINP, DIDP and DNOP "which can be placed into the mouth by children" is expected to come into force in 2006 for all economic actors.

Against this background, we confirm that in our production we generally renounce already now the use of the softeners DEHP, DBP, BBP, DINP DIDP and DINOP for the production of toys and childcare articles as well as other articles aimed at and /or used by children which can be placed into the mouth – within the meaning of the EU Directive on Phtalates.
